

# Dallas Area Torah Association

7/16/08

Esteemed Board Members, Committee Chairpersons, Supporters and Friends of DATA:

It is my distinct joy and pleasure to inform you of the official hiring of the next class of DATA rabbinical staff. Untold hours have been invested by Rabbis Hurwitz, Abrams, Epstein and myself to ensure DATA continues its reputation of hiring the highest quality rabbinical couples to best serve the Dallas community as well as the Beis Hamedrash. I am excited and proud to inform you that these efforts have borne fruit, with the addition of 4 top-notch couples whom are capable and highly motivated to continue and enhance the vital work of DATA.

A special yasher koach goes to our wonderful new Rosh Chaburah (Assistant to Rosh Kollel) Rabbi Mayer Hurwitz, and to his wife Mrs. Elana, for their tremendous dedication and hard work in locating and interviewing couples in Israel and the US. They went far beyond the call of duty, and we are very fortunate to welcome such a high quality couple to our staff whose reputation precedes them in the Yeshiva world. I much enjoyed joining R' Hurwitz in Israel last week to finalize the interview and hiring process.

The four new couples are: Rabbi Doni & Mrs. Rochel Frolich, Rabbi Shmuel & Mrs. Chana Muschel, Rabbi Tzvi & Mrs. Tzipora Goldman, and last but not least, Rabbi Meir & Liz Wahrsiger. These couples are all graduates of the illustrious Mir Yeshiva in Yerushalayim and are all well-known in their circles for their Torah scholarship, warm personalities and love of other Jews.

I am confident that this group, joining our present wonderful staff, will together raise DATA to new heights and accomplishments beyond our imaginations!

This new group will be arriving in the coming weeks to set up their homes

in anticipation of the fall semester at DATA. We look forward to the upcoming announcements of opportunities for you to join us in meeting and welcoming these wonderful couples to the DATA family!

Respectfully yours,  
With best regards from our Holy Land,

Rabbi Yerachmiel Fried  
Dean of DATA  
Rosh Kollel of Dallas Kollel
